Heuchera micrantha

Alumroot
Saxifragaceae

**Exposure**  Shade

**Water**  Occasional water

**Form**  Perennial

**Height**  8 inches

**Flower color**  White

**Bloom time**  Spring

This local alumroot is distinguished by its sharply lobed leaves and delicate stalks of small starry flowers. Grow it in a woodland garden with ferns or in a shaded rock garden. Needs good drainage.

**Habitat**  Moist banks and cliffs
