Salvia spathacea
Hummingbird Sage
Lamiaceae

**Exposure**  Partial shade

**Water**  Occasional water

**Form**  Perennial

**Height**  3 feet

**Flower color**  Red

**Bloom time**  Spring

Tall spikes of crimson flowers that are visited by hummingbirds rise above the large scented leaves of this sage. With regular water it spreads rapidly to form an evergreen ground cover. With less water it will be summer dormant.

**Habitat**  Oak woodland, chaparral
